

# Treatment Log Sheet

Read the Instructions for Use that come with NULIBRY before you mix and give a dose of NULIBRY the first time, and each time you get a new prescription of NULIBRY for your child. There may be new information. This information does not take the place of talking to your healthcare provider about your child’s medical condition or their treatment.

- Your child’s dose of NULIBRY is based on their weight. The amount of NULIBRY needed for each dose and the number of vials needed to prepare each dose may change at each visit with your healthcare provider.
- Remember to bring this “Treatment Log Sheet” to each follow-up visit with your healthcare provider.
- At each visit, be sure that your healthcare provider or pharmacist updates the correct amount of milliliters (mL) needed for each dose and the number of vials of NULIBRY needed to prepare each dose.

To be completed by the healthcare provider or pharmacist:

<b>Date:</b>	<b>Provider's/pharmacist's name:</b>
<b>NULIBRY dose prescribed in mL:</b>	<b>Number of vials needed to prepare each dose:</b>

Record daily infusion information here. Be sure to keep this information up-to-date when the dose changes.

Date	Lot number(s) from vials	Volume of NULIBRY given in mL	Dose start time	Dose finish time

Please see the Instructions for Use contained within the NULIBRY packaging.
